

HUILIN SHEN

UI/UX & Product Designer

London, UK · +44 7419 206893 · huilinshen1109@gmail.com · www.huilinshen.com · linkedin.com/in/huilinshen

Product and interaction designer specialising in AI-native products and physical–digital experiences — driving 0–1 concept development and translating complex technologies into clear, intuitive interaction systems.

EXPERIENCE

Junior HMI Designer (UI/UX & Interaction) | Huawei Technologies R&D (UK) Ltd | London May 2025 – Jul 2026

Generative Watch Face — [AI-native UX](#) · [Interaction Systems](#) · [Design Systems](#)

- Led the end-to-end interaction design of an AI-native smartwatch interface, defining its navigation model, visual hierarchy, motion behaviour and reusable UI components.
- Designed feedback patterns that communicate the AI's interpretation and confidence, helping users anticipate, confirm or correct its next action.
- Built high-fidelity prototypes that secured additional funding and an expanded project scope, winning backing from Huawei's China HMI HQ and European Research Institute.

Inner Voice (exploratory research) — [Silent-Speech Wearable](#) · [Sensing Research](#) · [Multimodal Interaction](#)

- Initiated a silent-speech wearable concept for detecting subvocalisation as a discreet, screen-free way to interact with AI. Collaborated with researchers and engineers to explore multimodal sensing at the collarbone, avoiding face- and jaw-based devices.
- Translated the concept into storyboards, interaction scenarios and 3D form prototypes, balancing privacy, comfort, social acceptability and hardware constraints.

UI/UX Design Intern | Illuminera, an IQVIA business | Shanghai

Jan 2023 – Jun 2023

- Designed visual identities and UI systems for two internal research and data-analysis platforms, creating scalable patterns for information-dense workflows.
- Contributed to consumer and category research, packaging concepts and launch positioning for Suntory Qingxiang Oolong Tea, working with Suntory and Tmall Innovation Center. The product became Suntory China's highest-performing new launch by GMV within six months.

Industrial Design Intern | GoodMatter Design Studio | Shanghai

Jan 2020 – Sep 2020

- Shaped physical and touchscreen concepts for FOTILE's third-generation integrated cooker and extraction system, translating kitchen behaviours from user research into product form, interaction flows and interface requirements.
- Developed the product's signature "Skyline" interface, using motion, colour and lighting to communicate cooling and extraction states. The commercialised product received an iF Design Award and Gold at the 2022 China Excellent Industrial Design Awards.

EDUCATION

MDes Interaction Design, Merit | Glasgow

2024

University of Glasgow & Glasgow School of Art

BSc Industrial Design | Shanghai

2023

University of Shanghai for Science and Technology

SKILLS

Design: AI interaction design, user research, information architecture, motion design, design systems, usability testing

Prototyping & Tools: Figma, Photoshop, Illustrator, After Effects, Rhino, KeyShot

AI & Front-end: AI-assisted prototyping and design-to-code workflows (Claude Code, Codex); working knowledge of HTML, CSS and JavaScript

Languages: Mandarin Chinese (native), English (fluent)
